CLIPSAL
C-Bus 2
Infrared Reader
CAT No. 5100RP

CE

IR Rx      USB OK

**5100RP**

The C-Bus Infra-red Reader is an accessory to the 5034NIRT Infra-red Transmitter series of devices. It allows the learning of Infra-red codes from third party remote controls. Such devices may include televisions, video cassette recorders, motorised blinds, air-conditioning and other IR controlled devices.

Specialised software tools are provided for control of the unit. The software allows the user to create XML files that can be imported into the CIRCA software, which is used for programming of the 5034NIRT series of devices. The software tools also provide for visual exploration of IR codes.

The Infra-red Reader software must be used on a computer running Windows 98, Windows ME, Windows 2000 or Windows XP operating system. Note: Windows 95 and Windows NT do not support USB and are consequently not supported.

The Infra-red Reader is supplied with a USB lead for easy connection to a laptop computer or PC and a CD-ROM containing the specialised software tools.

Like all the other units that make up a C-Bus system, the C-Bus Infra-red Reader is Australian designed, developed and manufactured by Clipsal Integrated Systems Pty Ltd.
