*The Milestone XProtect Smart Client provides exceptional control, efficiency and adaptability*

## Demand Perfection

Providing a unique combination of control, efficiency and adaptability, the Milestone XProtect™ Smart Client continually sets the standard in IP video management solutions. Designed for Milestone XProtect IP video management platforms\*, the XProtect Smart Client is an easy-to-use client application with superior features for ultimate control of the surveillance installation. Simply put, it perfects your installation.

## Unparalleled Usability

The flexible camera views featured in the Milestone XProtect Smart Client provide seamless access to live and recorded video, while integrated event and device control provides surveillance operators with an extremely efficient working environment. Additionally, synchronized playback and Smart Search functions enable accurate and efficient investigation of incidents with easy export of evidence material.

## Empowerment with the Milestone open platform

Milestone is the world's leading provider of open platform IP video surveillance software. XProtect is designed with open architecture that allows for integration with the widest choice of network video and computer hardware. The XProtect products interface with more than 750 IP cameras, encoders and select DVRs from over 75 different manufacturers.

The open platform lets you optimize your security installation with today's and tomorrow's best-of-breed solutions since hardware is decoupled from software. By integrating IP video with multiple security systems and video analytics, you gain true value-adding efficiency and expand your capabilities.

*\*Functionality of the Milestone XProtect Smart Client is determined by the specific XProtect product platform*

**Developed by the world's leader in IP video management software, the Milestone XProtect Smart Client perfects the security operation by providing:**

- ◆ **Control** - instant control of cameras, connected devices and other system components with overlay buttons vastly improves the effectiveness of the surveillance installation
- ◆ **Efficiency** - security operators can quickly investigate and extract evidence with the Sequence Explorer that provides intuitive navigation through captured video and time sequences
- ◆ **Adaptability** - the user interface is easily customized according to skill-level and work tasks helping reduce training and operator costs

The Open Platform Company

# Perfecting Your Security Operations

Powered by Milestone XProtect IP video management platforms, the Smart Client is the operator tool used to view and control cameras. The Smart Client provides instant access to live cameras or recorded video and presents up to 100 cameras in a single view. Cameras are easily controlled through integrated PTZ (Pan-Tilt-Zoom) control and digital zoom. Integrated devices and systems can be intuitively controlled through either the overlay buttons or Milestone's state-of-the-art mapping function that portrays the entire surveillance installation in interactive, multi-layered maps.

## Find and Create Evidence Fast

Seaching through extensive recordings to find a specific incident can be very time consuming. But Milestone XProtect Smart Client provides advanced features such as Smart Search, Instant Playback and Sequence Explorer to investigate incidents as they happen while simultaneously analyzing recorded video material.

## Customized to Meet User's Needs

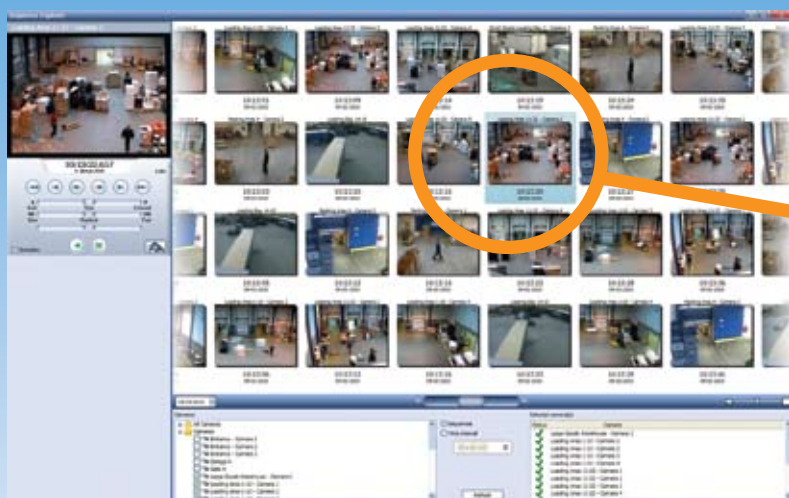

Proven in more than 50,000 installations around the world, the Smart Client fits the needs of a wide variety of customers. The Smart Client is available in 19 different languages; significantly improving productivity by removing the language barrier. And with the latest version of the Smart Client, operators can modify the application to align with their specific skill level and needs.

The unique combination of control, efficiency and adaptability offered to security managers and operators with the XProtect Smart Client more than meets the industry's growing demand for making large and complex security systems simple to operate and manage.

**The Milestone XProtect Smart Client** is known for its ease of use and superior features. So the latest version simply makes a great product even better.

With the new Smart Client 5.0, Milestone is again changing the game in IP video management software by providing superior features:

- ◆ **The Sequence Explorer** is an industry-new investigation tool that previews recorded video sequences as drag-and-throw image thumbnails. Recorded video is easily browsed to locate incidents and rapidly create evidence.
- ◆ **The new Independent Playback function** allows operators to play back events on one camera while still monitoring live video.
- ◆ **Overlay Buttons** enable intuitive control of cameras, camera-integrated devices and other integrated systems directly from the camera view to improve surveillance efficiency.
- ◆ **The updated and adaptable User Interface** makes the application easier to use and navigate.

## Sequence Explorer brings the security industry an exceptional level of usability

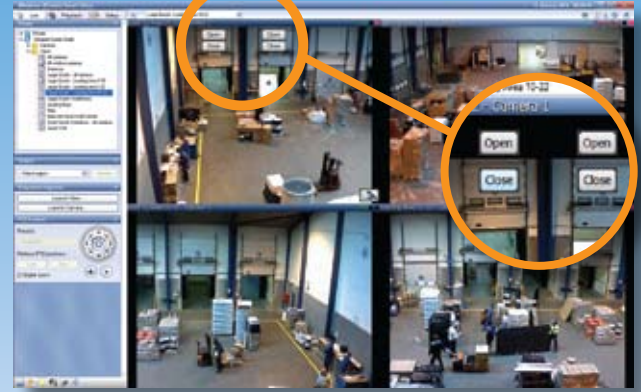

The innovative Sequence Explorer provides intuitive navigation of captured video and time sequences from one or multiple cameras, enabling accurate and fast investigation of incidents and evidence extraction. The Sequence Explorer is smooth to navigate with a sliding preview and "drag-and-throw" function for video thumbnails. The Sequence Explorer seamlessly connects to live and playback modes of the XProtect Smart Client.

# The XProtect Smart Client makes Complexity Simple

## Easily examine recordings with the playback function

The Smart Client's playback functionality is easy and intuitive to use with large control buttons for video playback and browsing. Recordings can be played back from all cameras in the view or from one or more cameras; allowing the operator to compare recordings from different time periods and quickly detect inconsistencies.

## Increase response time with integrated control

Control of external system devices such as speakers, lights, gates and input/output devices is easier than ever with the overlay controls of the XProtect Smart Client. Appearing as **overlay buttons** when mousing over a particular camera, the buttons provide an intuitive and logical working environment that improves response time.

## Exceptional situational awareness with Smart Wall

The XProtect Smart Client also integrates seamlessly with Milestone's Smart Wall for XProtect Corporate; an advanced video wall product that provides supreme situational awareness for large surveillance installations. Being independent of any specific hardware or network configurations, the Smart Wall simplifies management of complex sites and layouts are easily populated by dragging and dropping cameras into the monitor views.

## Complete installation overview with the Map function

The XProtect Smart Client includes a state-of-the-art mapping function that portrays the entire surveillance installation in interactive, multi-layered maps. Mapping functionality allows intuitive navigation through clickable hot-zones, and cameras are previewed by "mousing over" them, and real-time updates of system components are displayed directly on the map.

"Milestone is simple to use. With no training I was able to use it immediately - very intuitive. When there is an incident, the security team can access the video footage quickly with a non-stop flow of evidence from camera to camera. The software is well thought out and designed, easy to configure, maintain and use. It really is a great piece of technology."

Mark Fancourt, Vice President Information Technology at Pan Pacific Hotels Group

### The open platform: a foundation for long-term success

Milestone XProtect acts as the powerful core of surveillance systems, providing the widest choice in third-party hardware components and integration with other business systems. It is the foundation enabling you to cost-effectively choose the best solutions for today and tomorrow.

### About Milestone Systems

Founded in 1998, Milestone Systems is the global industry leader in true open platform IP video management software. The XProtect™ platform delivers powerful surveillance that is easy to manage, reliable and proven in thousands of customer installations around the world. With support for the widest choice in network hardware and integration with other systems, XProtect provides best-of-breed solutions to 'video enable' organizations – reducing costs, optimizing processes, protecting people and assets. Milestone software is sold through authorized and certified partners. For more information, visit: [www.milestone.com](http://www.milestone.com).
