Presco

PSE Rugged Keypads

The Presco™ PSE is a vandal and weather resistant keypad designed to be used in harsh environments. Simply add a PSE to a PAC access controller to get all of the features of the Presco™ system, with the added benefit of rugged durability

Features

- Rugged construction for weather and vandal resistance
- PSE keypad can be backlit making it easy to use in dimly lit areas
- Surface mount adaptor available

With the Presco™ system the door controller and reader are separated, allowing the controller to do the code processing in a remote protected environment. The code is transmitted from the reader using only two wires, making installation simple and cost effective. The door controller and reader can be separated by up to 1 kilometer using low cost 4 core non-shielded cable!

PSE Rugged Keypads

The *Presco*™ *PSE* vandal and weather resistant keypads are compatible with the *Presco*™ *PAC* series of door access controllers. When a *PSE* is coupled with any *PAC* series door access controller you get the benefits of a secure door access control solution with all of the features of the *Presco*™ system. The rugged good looks of the *PSE* keypads make them an ideal choice for any access controlled door where vandal and weather resistance are priorities, and ease of use is essential.
Features
- Operating temperature range of -10ºC to +70ºC
- Storage temperature of -40ºC to +70ºC
- Resistant to saline mist
- Front sealed to IP67

Other Products In The Presco™ Family

PAC1 and PAC2 Door Access Controllers

The *Presco*™ *PAC (Presco*™ *Access Controller)* door access controllers utilise the latest microprocessor technology to operate an electric door locking device. Together with a *Presco*™ encoder (or other devices with the addition of a *Presco*™ *I*nterface *M*odule model *PIM*) the *PAC* offers affordable access control to restricted areas for up to 400 users.

PRE Standard Keypad

The *PRE (Presco*™ *Remote Encoder)* is designed to be used with the *PAC* series door access controllers in areas where keypad security is desired, but weather and vandal resistance is not a priority. When a *PRE* is coupled with any *PAC* series door access controller you get the benefits of a secure door access control solution with all of the features of the *Presco*™ system.

PIM Interface Module

The *PIM (Presco*™ *Interface Module)* can be used to convert commonly used data formats to either *Presco*™ or Wiegand format. Formats supported include Wiegand, Clock & Data and *iButton*™.

PRX Indoor Proximity Reader

The *PRX* proximity reader is an advanced, self contained *Radio Frequency IDentification* (RFID) contactless reader designed to be used in conjunction with the *PAC* series door access controllers in areas where proximity security is desired, but weather resistance is not a priority. It can also be interfaced with most Wiegand input access controllers.

Sprite Outdoor Proximity Reader

The *Sprite* proximity reader is an advanced, self contained *Radio Frequency IDentification* (RFID) contactless reader designed to be used in conjunction with the *PAC* series door access controllers in areas where proximity security is desired, and weather resistance is a priority. It can also be interfaced with most Wiegand input access controllers.

PACDL Data Logger

The *PACDL (Presco*™ *Access Control Data Logger)* offers an affordable access control package for up to 8 access points when used with the *PAC* series door access controllers. The *Data Logger* provides a user friendly platform for access control with the ability to store data and program your access control system locally or on a PC.
