PASSIVE INFRARED DETECTOR

WONDEREX

SX-360Z, SX-360ZV

〔Standard〕 〔Alarm Memory〕

SX-360Z is Listed to both UL and ULC.
SX-360ZV is not Listed to UL nor ULC.

N219 C E

FEATURES

○ Ceiling Mount 360° PIR Detector
○ Zoom Area Adjustment : φ60ft Detection Area can be obtained at any installation height between 8 to 16ft. (φ18m at H. 2.4 to 5.0m)
○ High Density Detection Area with 276 zones.
○ Selectable Sensitivity (High, Medium or Low)
○ Selectable Pulse Count (1, 2 or 4)
○ Initial Alarm Memory (SX-360ZV)
○ LED Remote Control Terminal

I. INSTALLATION HINTS

① Avoid direct sunlight.

② Avoid looking directly at air conditioning or heating vents.

③ Avoid vapor or high humidity that can cause condensation.

④ Avoid Curtain, Screen, etc. blocking detection area.

⑤ Do not install outdoors.
⑥ 8~16ft (2.4~5m)
Install within 8~16ft (2.4~5m) height from floor.

II. DETECTION AREA

-Body

Ⅳ. INSTALLATION METHOD

① Remove the ZOOM-Unit from the Sensor-Body by loosing "fastening screw" and turning the ZOOM-Unit counter-clockwise.

② Mount the Sensor-Body and wire according to Section V.
Full up the mounting holes with the sponge.

③ Adjust "ZOOM (Section VII)", Sensitivity (Section VI), according to the required installation height.

④ Replace the ZOOM-unit by turning it clockwise, and supply power to unit. When LED stops blinking, the warm-up period is complete (approx. 20 sec.).

⑤ Conduct a Walk Test.

⑥ Select pulse count (See Section IX.) according to your coverage needs and environmental conditions. Fasten cover with fastening screw.
NOTE : When the warm-up period is over, alarm may be given once.   This is an electric characteristic of SX-360Z and not a mal-function.

Ⅴ. WIRING

SX-360Z

SPARE

TAMPER
N.C.

D.L. (See Sect. X.)

ALARM OUTPUT
(N.C. 28VDC 0.2A max)

POWER INPUT (6~18VDC 18mA max)

Power wires should not exceed the following lengths.

WIRE SIZE \ VOLTAGE	SX-360Z		SX-360ZV	
	12V	14V	12V	14V
AWG22 (0.33mm²)	1070′ (320m)	2140′ (650m)	770′ (230m)	1530′ (460m)
AWG20 (0.52mm²)	1700′ (510m)	3400′ (1020m)	1200′ (360m)	2400′ (730m)
AWG18 (0.83mm²)	2700′ (820m)	5300′ (1600m)	1900′ (570m)	3800′ (1150m)

SX-360ZV

TAMPER

D.L (See Sect. X.)

ALARM MEMORY
(See Sect VIII.)

INITIAL ALARM MEMORY
(See Sect VIII.)

SPARE } Two spare teminals are electncally connected on the circuit board.

SPARE

ALARM OUTPUT (N.C. 28VDC 0.2A max)

POWER INPUT (6~18VDC 25mA max.)

● When using two or more units on one wire, the maximum length is obtained by dividing the above length by the number of units used.
● UL requires SX-360Z to be connected to a UL listed power supply capable of providing a nominal input of 12VDC (6~18VDC) 18mA(max.) [SX-360Z], and battery standby time of 4 hours.

Ⅵ. SENSITIVITY ADJUSTMENT

① 8~16ft (2.4~5m)

φ30~φ60ft (φ9~φ18m)
Before making adjustments, determine the mounting height and detection area. (See Section VII.)
② Select the sensitivity "H (High)", "M (Medium)" or "L (Low)". The following chart shows recommended setting for diameter of detection area.

| SENS.	L	M	H
DIAMETER OF DETECTION AREA	φ30~φ40ft. (φ9~φ12m)	φ40~φ50ft. (φ12~φ15m)	φ50~φ60ft. (φ15~φ18m)

Ⅶ. ZOOM AREA ADJUSTMENT

The SX-360Z series detection pattern can be adjusted for installations at any height, between 8 to 16ft. (2.4~5m).

≪DETECTION AREA CHART≫   ft. (m)

MOUNTING HEIGHT / ZOOM-LOCK SCREW	A	B	C	D	E
16ft. (4.8m)	φ60 (φ18)	———	———	———	———
14ft. (4.2m)	φ52 (φ16)	φ60 (φ18)	———	———	———
12ft. (3.6m)	φ45 (φ13)	φ50 (φ15)	φ60 (φ18)	———	———
10ft. (3m)	φ37 (φ11)	φ40 (φ13)	φ50 (φ15)	φ60 (φ18)	———
8ft. (2.4m)	φ30 (φ9)	φ34 (φ10)	φ40 (φ12)	φ48 (φ14)	φ60 (φ18)

ZOOM
A · B · C · D · E
DO NOT FASTEN THE SCREW TOO TIGHTLY.
≪ADJUSTING THE ZOOM UNIT≫
① Loosen the black Zoom Lock screw.
② ZOOM Ring / ZOOM Lens
Turn ZOOM Ring for adjustment.
For higher installations, turn counter-clockwise.
For lower installations, turn clockwise.

③ Fasten the black Zoom Lock screw at the marked point of the required installation height.
DON'T FASTEN THE SCREW TOO TIGHTLY.

Ⅷ. INITIAL ALARM MEMORY & ALARM MEMORY (SX-360ZV)

The SX-360ZV has an "initial alarm memory function." When several detectors are connected in one alarm loop, this function will indicate, by LED, memories which of the detectors was triggerd first.
1. Wiring of Alarm Memory

Connect control voltage signal terminal of control panel to A.M. terminal.

	SX-360ZV
System armed	0~1VDC (grounded)
System disarmed	Open

"grounded"＝AM terminal is electrically connected with ⊖ power supply terminal (ground).

2. Wiring of Initial Alarm Memory

Connect I.A. terminals of the detectors in one loop. (Parallel Connection)

NOTE : Maximum 40 detectors can be connected in one loop for initial alarm memory.

3. LED Indications

If the unit if triggered during an armed period, when the system is disarmed, it's LED condition will indicate that it reported the alarm.
★ When the initial alarm memory is used :
Initial alarm memory is indicated by a flickering LED. Other memories (from the second detection on) are indicated by a continuosly lit LED.

No.	LED
1	OFF
2	Flickering
3	Continuously lit
★ When the initial alarm memory is not used :
All alarm memories are indicated by flickering LED.

No.	LED
1	OFF
2	Flickering
3	Flickering

4. Reset

Alarm memory resets automatically when system is re-armed.

5. NOTES

Alarm Memory will operate whether the LED is disabled or not.
Alarm Memory will not latch while system is disarmed. LED operation and alarm output are not affected by alarm memory when system is armed.

A compatible control panel is required for alarm memory.
Ⅸ. PULSE COUNT ADJUSTMENT

TEST
PULSE COUNT

Adjust pulse count as follows.

★ Pulse Count 1 (Instant alarm mode)
Select this position for walk test only.

★ Pulse Count 2 (Standard position)
Select this position for most applications.

★ Pulse Count 4
For bad environments, changing temperatures etc.

Ⅹ. LED ON-OFF

1. LED On/Off Switch (Models SX-360Z)

Use switch to enable or disable LED.

2. DL Terminal

★ Controls operation of LED only ; does not affect Alarm Memory function.
★ LED can be enabled/disabled remotely or at the detector.

|	Remotely	At the Detector
LED Enabled	Connect DL terminal to common ground (with detector).	Connect ⊖ terminal of power input to DL terminal.
LED Disabled	No ground to DL terminal (open circuit).	No connection to DL terminal (open circuit).

Ⅺ. TROUBLE SHOOTING AND MAINTENANCE

PROBLEM	PROBABLE CAUSE	REMEDY
LED does not light.	Incorrect power supply voltage. (disconnection, or low voltage)	Correct supply voltage to 6〜18V DC.
	Incorret detection area.	See Section Ⅱ and Section Ⅶ.
	Incorrect polarity to detector.	Switch positive and negative at terminal.
	LED switch is OFF	Turn on the Switch. See Section Ⅹ.
LED lights even though no person within area.	Moving object within area. (curtain, wall hanging, elc.)	Remove object from detection area.
	Rapid temperature changes (heater, air-conditioner, etc.) within area.	Remove the sources from detection area.
LED continues to light	Poor connection of alarm memory. (SX-360ZV)	Reconnect wire.
	Wrong control voltage from panel. (SX-360ZV)	Must be 0〜1VDC. (grounded)
LED lights but signal is not sent.	Relay contact is stuck of damaged due to overloading.	Check load of output. The unit needs repair or replacement.
	Faulty Wiring.	Wire correctly.
Conduct a walk test at least once per year.		

Ⅻ. SPECIFICATIONS

Model	SX-360Z
Detection method	Passive Infrared
Coverage	ϕ60ft. (ϕ18m), 360˚ZOOM
Detection zones	276 zones
Mounting	Ceiling : Height 8〜16ft. (2.4〜5m)
Sensitivity	3˚F (1.6˚C) at 2ft/sec. (0.6m/sec.) See Sect Ⅵ.
Detectable speed	1〜6ft/sec. (0.3〜1.8m/sec.)
LED indicator	LED is blinking during warm-up period.
	Alarm condition
Alarm period	2.0±0.5sec
Alarm output	N.C., 28VDC 0.2A (max)
Tamper switch	N.C., 30VDC 0.1A max, Opens when cover removed.
Pulse Count	20±5sec. 1,2or4
Warm up period	Approx 20sec. (LED blinks.)
Power input	6〜18VDC
Current draw	13mA/(normal), 18mA/(max)
Weight	7.90oz. (224g)
Operating temperature	−4˚F〜+122˚F (−20˚C〜+50˚C)
Environment humidity	95%(max)
RF interference	No Alarm 30 V/m

V Version (Alarm Memory)	
Model	SX-360ZV
Alarm memory	Armed : 0 〜 1VDC. See Sect. Ⅷ.
Initial Alarm memory	Max.40 detectors See Section. Ⅷ.
Current draw	13mA/(normal), 25mA/(max)
Weight	8.00oz. (227g)
RF interference	No Alarm 30V/m
